Qq

Q, q /kjuː/.
The seventeenth letter of the modern English alphabet and the sixteenth of the ancient Roman one, in the latter an adoption of the ϙ (*koppa*) of some of the early Greek alphabets, in turn derived from the Phoenician letter used to represent voiced uvular. In Latin, Q was regularly used with *v* to represent the double sound /kw/; subsequently in Romance languages, esp. French, it also represented simple /k/. In Old English the ordinary representation of the sound was *cw-* (earlier also *cu-*). After the Norman Conquest *qu-* was introduced, and by the end of the 13th cent. *cw-* was entirely discontinued, with *qu-* (or its variants *qv-*, *qw-*) being the established spelling for all cases of the sound /kw/, whether of English, French, or Latin origin. In ordinary modern English Q is normally only used in *qu*, whether initially as in ***quake***, ***quality***, medially as in ***equal***, ***sequence***, or finally with the sound /k/ as in ***cheque***, ***grotesque***. Q used alone varies with *k* and *kh* in transliterations of Semitic languages, as ***qat***, ***Qur'an*** for ***khat***, ***Koran***. Q in transliterations of Chinese is normally pronounced /tʃ/.
